## Express Couriers Facts at Your Fingertips

We're on the go every day of the year delivering over 40 million courier parcels throughout New Zealand. That's 10 courier parcels for every New Zealander, every year.

Our 913 couriers work from 36 locations throughout the country, and are backed up by over 1,400 processing and office staff.

We have a road fleet of over 158 trucks ranging in size, with over 250 vehicles available on demand. This fleet make more than 2,000 individual trips each week covering 14 million kilometres per year. That's 7,000 trips from Cape Reinga to Bluff each year – imagine the traffic jams if everyone in New Zealand delivered their packages personally!

Our trucks are the latest vehicles available with low-emission, economical, engines all operating with GPS equipment. This GPS technology allows Express Couriers to select the most efficient routes in terms of fuel use, and monitors vehicle speeds, engine revs, braking habits and engine-idling periods.

Together with Air Post – New Zealand Post's air delivery network, we operate a fleet of eight aircraft including a Boeing 737 freighter. This fleet makes more than 180 flights each week, totalling more than 4,000 hours each year, that's the equivalent of 166 days of non-stop air travel each year. All flights are packed to their maximum, and fly the shortest distance required, to ensure the most efficient use of this air travel.
