Security in 2017 and Beyond
## Symantec's Predictions for the Year Ahead

NEW ERA OF CYBERCRIME

Rogue nation states will finance themselves by stealing money

Fileless malware will increase

SSL will lead to increased phishing sites using HTTPS

Drones will be used for espionage and explosive attacks

IOT DEVICES OFFER PROFITABLE REVENUE STREAMS FOR CYBERCRIMINALS

Connected cars will be held ransom

IOT devices in the enterprise will increase points of exposure

IoT DDoS attacks will increase

HACKS IN THE CLOUD

Ransomware will attack the cloud

Machine Learning will be moved to the front lines in the battle against cybercrime
