

4 November 2008

MEDIA STATEMENT

Embargoed until 10:00am, Tuesday 4 November 2008

Dr Peter Bushnell
Deputy Secretary to the Treasury

FINANCIAL STATEMENTS OF THE GOVERNMENT OF NEW ZEALAND FOR THE THREE MONTHS ENDED 30 SEPTEMBER 2008

The Financial Statements of the Government of New Zealand for the three months ended 30 September 2008 were released by the Treasury today.

The monthly financial statements are compared against the monthly forecast tracks based on the 2008 Pre-Election Economic and Fiscal Update.

Results for the three months ended 30 September 2008

- OBEGAL was \$0.5 billion higher than forecast, at \$0.9 billion. This variance was due mainly to tax revenue, which was \$0.5 billion (3.9%) higher than forecast. While most tax revenue types were broadly in line with forecast, there are two items to note:
 - Corporate tax and GST revenue were increased by \$0.2 billion and \$0.1 billion respectively, as a result of the late reversal of accruals relating to an earlier period. These accrual reversals did not affect cash receipts.
 - Putting aside the impact of these accrual reversals, GST revenue was close to forecast, but corporate tax revenue was \$0.2 billion lower than forecast. Company income tax assessments were lower than expected in a period usually dominated by provisional tax payments from multi-national and finance sector companies. These companies are likely to be amongst those most affected by the current international financial turmoil.
- The total Crown operating balance was a \$0.8 billion deficit (\$1.7 billion lower than the forecast \$0.9 billion surplus). The two main features of this lower-than-expected result were:
 - \$1.8 billion related to losses on the investment portfolios of Crown financial institutions. This was mainly due to continuing turmoil in financial markets, and
 - \$0.4 billion related to a loss arising from a drop in the discount rate used for valuing ACC's outstanding claims liability.

These losses were partly offset by tax revenue which was \$0.5 billion higher than forecast, as noted above.

fax. 64-4-473 0928
www.treasury.govt.nz

- The core Crown residual cash deficit was \$1.1 billion lower than forecast at \$3.2 billion. This was mainly due to delays in transferring \$0.7 billion for the NZ Fast Forward Fund pending the resolution of governance issues; and \$0.3 billion higher-than-expected petrol royalties received due to high oil prices earlier in the year.
- Gross debt was \$1.0 billion higher than forecast at \$31.9 billion. This was mainly due to valuation changes on financial instruments (particularly derivatives) and higher-than-expected issues of Government Stock.
- Net core Crown debt was \$1.4 billion lower than forecast at \$2.6 billion due mainly to the lower-than-expected residual cash deficit (noted above) and valuation changes on financial instruments.

Year-on-Year Perspective	10

Financial Statements

Statement of Accounting Policies	14
<i>This section outlines the summary accounting policies underpinning the preparation of the financial statements of Government. It refers readers to the Treasury website where the accounting policies are set out in full.</i>	
Statement of Financial Performance	16
<i>The statement outlines the operating results of the total Government (i.e. the revenues and expenses of all departments + Reserve Bank + NZS Fund (core Crown), SOEs (including Air New Zealand) and Crown entities). Expense by functional class is also shown for total Crown and core Crown.</i>	
Statement of Cash Flows	18
<i>The statement sets out the cash flows that result from the operating, investing and financing activities of the Government. The net cash flows from operations are reconciled to the operating balance reported in the statement of financial performance.</i>	
Statement of Recognised Income and Expense	20
<i>The statement reports changes in net worth due to the operating balance, items of income or expense that are recognised directly in net worth, the effect of certain accounting changes and corrections of errors.</i>	
Statement of Financial Position	21
<i>The statement outlines the balance sheet results of the total Government (i.e. the assets and liabilities of the core Crown + SOEs + Crown entities).</i>	
Statement of Borrowings	22
<i>The statement outlines total borrowings (split by sovereign-guaranteed debt and non sovereign-guaranteed debt) less financial assets.</i>	
Statement of Commitments	23
<i>The statement outlines the commitments of the total Government by type and segment.</i>	
Statement of Contingent Liabilities and Assets	23
<i>The statement outlines the contingent liabilities and assets of the total Government by type and segment.</i>	
Notes to the Financial Statements	24
<i>The notes are an integral part of the financial statements, providing further explanatory material to that provided in the main statements.</i>

3 Using forecast GDP for the year ended 30 June 2009 of \$184,390 million (Source: Treasury)

Core Crown includes Ministers, Departments, Offices of Parliament, the NZS Fund and the Reserve Bank of New Zealand but excludes State-owned enterprises and Crown entities.

Table 2 – Key indicator variances for the three months to 30 September 2008

Key Indicator	Variance	Key Drivers
Core Crown		
Core Crown revenue (excl. NZS Fund revenue)	\$0.4 billion (higher than forecast)	<ul style="list-style-type: none"> • Core Crown tax revenue was \$0.5 billion (3.5%) higher than forecast. This was comprised of: <ul style="list-style-type: none"> ○ Source deductions were \$0.2 billion (2.8%) higher than forecast. The forecast for source deduction revenue was understated and did not take proper account of the superannuation withholding tax impact of Police staff moving from the Government Superannuation Fund. These transfers increased the amount of Employer Superannuation Contribution tax revenue relative to forecast. ○ GST revenue was \$0.2 billion (5.2%) higher than forecast. This was largely due to the late reversal of a \$0.1 billion accrual relating to an earlier period. The reversal did not affect tax receipts. ○ Other individuals tax was \$0.1 billion (18.5%) higher than forecast. In the main this is likely to reflect income tax returns for the 2007/08 tax year, particularly from the agriculture sector. This sector experienced higher returns during the 2007/08 tax year, as a result of higher commodity prices. We will be in a better position to confirm this explanation once we receive more detailed data in the coming months. ○ Corporate tax revenue was on forecast, but there were two significant variances within that result: <ul style="list-style-type: none"> - The late reversal of a \$0.2 billion accrual relating to an earlier period. The reversal increased company tax revenue, but did not affect tax receipts; and - The impact of the accrual reversal was offset by lower-than-expected income tax assessments in the September quarter. Company income tax assessments were lower than expected in a period usually dominated by provisional tax payments from multi-national and finance sector companies. These companies are likely to be amongst those most affected by the current financial turmoil. • Other revenue was \$0.2 billion higher than forecast, primarily in relation to petrol royalties. The high price of oil last year has led to a number of operations moving to a higher royalty threshold earlier than expected. • The higher-than-forecast income above was partly offset by interest revenue and dividends which were \$0.3 billion lower than forecast, primarily due to lower than forecast interest rates and investment levels.

Key Indicator	Variance	Key Drivers
Core Crown expenses	\$0.3 billion (lower than forecast)	<ul style="list-style-type: none"> • Core Crown expenses were \$0.3 billion lower than forecast. This was mainly due to: <ul style="list-style-type: none"> ○ Transport expenditure was \$0.2 billion lower than forecast due to an over-estimation of funding of state highways in the forecast. ○ Interest expenses were \$0.1 billion lower than forecast. This was mainly due to fluctuations in settlement cash balances and interest rates. ○ Other expenditure, across a number of departments, was \$0.2 billion lower than forecast. ○ The lower-than-forecast expenditure (above) was partly offset by an impairment of the investment in KiwiRail Holdings Limited of \$0.2 billion, which was not forecast.
NZS Fund operating balance	-\$1.1 billion (lower than forecast)	<ul style="list-style-type: none"> • The Fund's return for the month of September was -7.96%. This was the lowest return recorded by the Fund (for a single month) since its inception and reflects the weak performance of global equity markets. The Fund's annualised return since inception (September 2003) is 8.04%, compared to 6.92% for the risk-free of return (Treasury bills).
Core Crown residual cash deficit	\$1.1 billion (lower than forecast)	<ul style="list-style-type: none"> • The residual cash deficit was lower than forecast. This was primarily due to: <ul style="list-style-type: none"> ○ A delay in the transfer of \$0.7 billion funding for the NZ Fast Forward Fund pending the resolution of governance issues. ○ Petrol royalty receipts were higher than expected due to the cash impact of petrol royalty revenue (as noted above). • Core Crown tax receipts were on forecast.
GSID (excluding settlement cash)	-\$1.0 billion (higher than forecast)	<ul style="list-style-type: none"> • GSID (excluding settlement cash) was higher than forecast. This was largely due to valuation changes on financial instruments (particularly derivatives) and higher-than-expected issues of Government Stock.
Net core Crown debt	\$1.4 billion (lower than forecast)	<ul style="list-style-type: none"> • Net core Crown debt was lower than forecast. This was due mainly to: <ul style="list-style-type: none"> ○ A lower-than-forecast deficit in residual cash (as noted above). ○ Changes in the valuation of financial instruments.
Net core Crown debt (incl. NZSF)	\$0.1 billion (on target)	<ul style="list-style-type: none"> • On target.

Key Indicator	Variance	Key Drivers
Total Crown		
OBEHAL	\$0.5 billion (higher than forecast)	<ul style="list-style-type: none"> • Total Crown revenue was \$1.0 billion higher than forecast. The main components were: <ul style="list-style-type: none"> ○ Sales of goods and services by SOEs and Crown Entities were \$0.5 billion higher than forecast. The variance predominantly related to entities in the electricity sector and was caused by higher-than-expected spot electricity prices. The variance was partly offset by a corresponding variance in expenditure (as noted below). ○ Core Crown revenue was \$0.4 billion higher than forecast (as noted above). • The total Crown revenue result was partly offset by total Crown expenditure which was \$0.5 billion higher than forecast. The main components were: <ul style="list-style-type: none"> ○ \$0.3 billion higher-than-forecast expenditure by entities in the electricity sector (as noted above); and \$0.1 billion higher-than-forecast expenditure by DHBs, resulting from additional income devolved. ○ Kiwibank interest expense was \$0.1 billion higher than forecast. This was largely due to a classification issue in NZ Post's forecast as interest from Kiwibank was forecast on a net basis. This was offset by a corresponding variance in interest revenue. ○ These variances were partly offset by Core Crown expenses which were \$0.3 billion lower than forecast (as noted above).
Operating balance	-\$1.7 billion (lower than forecast)	<ul style="list-style-type: none"> • OBEHAL was \$0.5 billion higher than forecast (as noted above). • Net gains were \$2.2 billion lower than forecast. The main contributors were: <ul style="list-style-type: none"> ○ The NZS Fund, ACC and EQC all suffered losses on their financial instrument portfolios that were larger than expected. The amounts of the lower-than-forecast variances were \$1.5 billion, \$0.2 billion and \$0.1 billion respectively. The losses were the result of continuing turmoil in financial markets. ○ ACC also recorded a \$0.4 billion loss in the valuation of its outstanding claims liability. The loss arose from a decrease in the discount rate used to calculate the liability and was not included in the forecast (consistent with forecasting policy). • The lower-than-forecast gains above were partly offset by net gains by RBNZ and DMO, mainly due to changes in FX and interest rates, which are held constant for forecasting purposes.

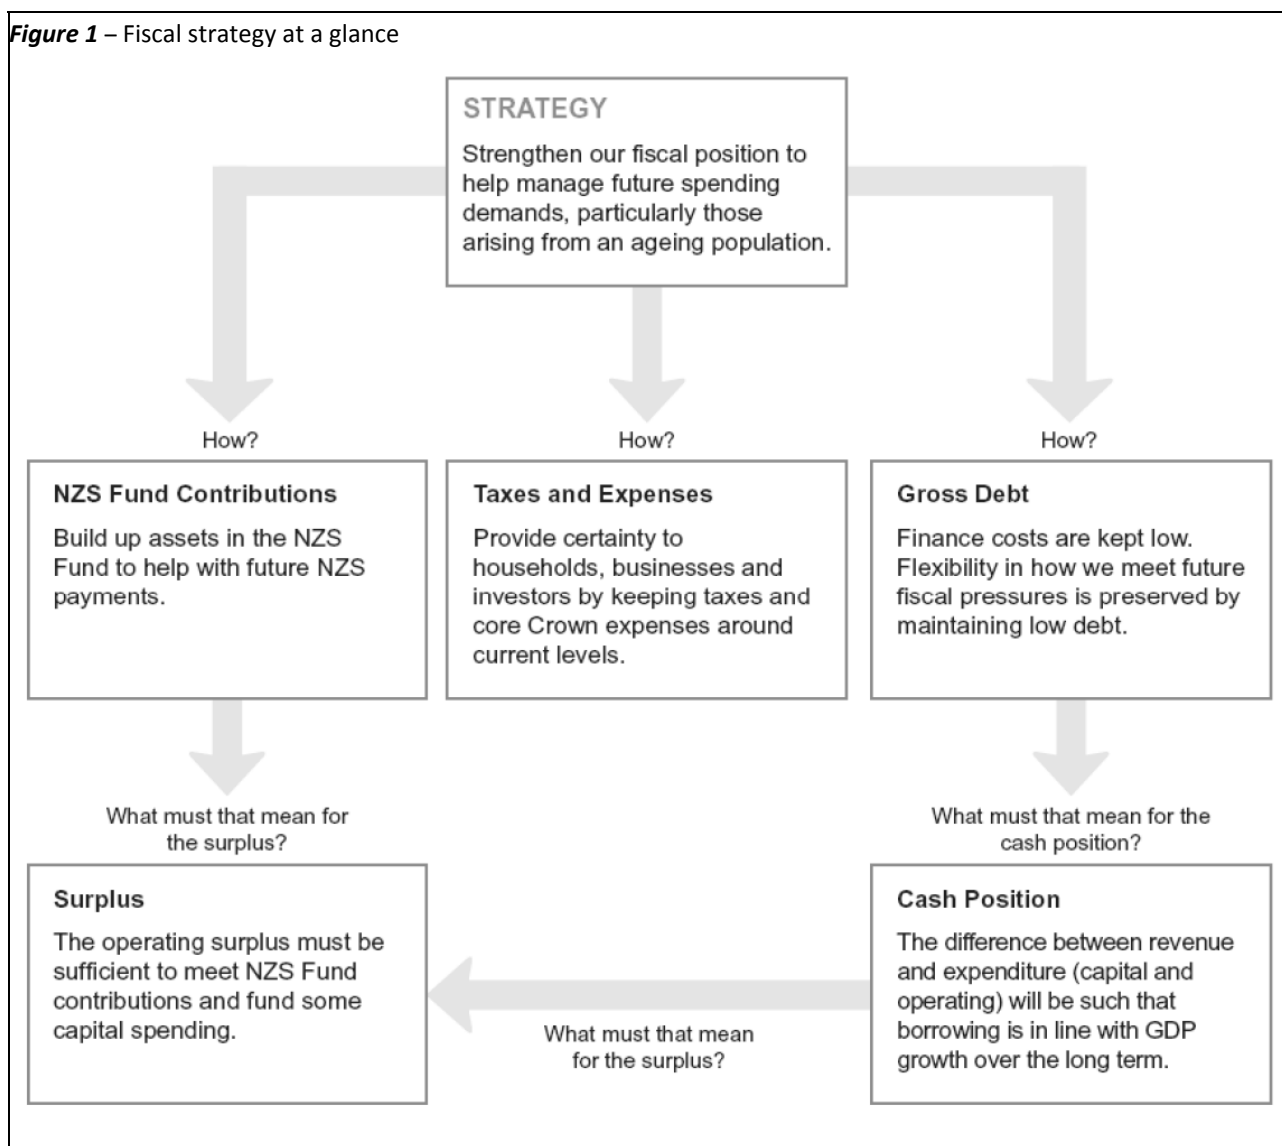

FISCAL STRATEGY PERSPECTIVE

The Government's fiscal strategy (outlined in more detail in the *2008 Fiscal Strategy Report*) is to strengthen its fiscal position so that it is well placed to respond to future challenges such as those associated with population ageing. The strategy is summarised in Figure 1.

The Government is implementing this strategy primarily by building up financial assets in the New Zealand Superannuation (NZS) Fund and maintaining gross sovereign-issued debt at around 20% of GDP. In order to keep debt at around 20% of GDP, the Government has said it intends to run its cash flow position so that borrowing tracks in line with GDP over time. In practice, this means running operating surpluses sufficient to cover the contributions to the NZS Fund and some capital spending needs.

The Financial Statements of the Government provide a record of the Government's financial performance over the 2008/09 financial year and its financial position as at 30 September 2008. They provide a comparison with the fiscal forecasts in the *2008 Pre-election Economic and Fiscal Update*. They also provide the public with a snapshot of the progress the Government has made in implementing its fiscal strategy as set out in its *Short Term Fiscal Intentions* and *Long Term Fiscal Objectives*.

Figure 1 – Fiscal strategy at a glance

Fiscal Strategy Perspective on the financial results to September

The following table shows how the fiscal strategy is represented in the financial results.

Table 3 – Fiscal strategy perspective

Amounts in \$ millions		Year to date				Full Year
		September	September	Variance	Variance	PREFU

Net Core Crown debt	2,592	4,186	(1,594)	(38.1)

¹ Due to the seasonal nature of some expenditure it is not appropriate to annualise these changes.

Revenue and Expenses

Total taxation revenue for the three months ended 30 September 2008 has increased by \$0.5 billion (3.6%) on the same period last year. The increase was primarily in GST, PAYE and other individuals tax. The increase in GST revenue was primarily due to timing effects in the accrual of GST revenue in June/July 2007, which artificially lowered GST revenue in the September 2007 quarter, thereby increasing the growth rate for the September 2008 quarter. The increase in PAYE was driven by high wage growth and the increase in other individuals tax was driven by growth of unincorporated profits (particularly in the agriculture sector).

Partly offsetting this increase was a decline in corporate tax. The decline in corporate tax reflects the cut in the corporate tax rate from 33% to 30% and generally lower profits in the current tax year compared to last year.

Total **core Crown expenses** were \$1.3 billion (9.5%) higher than the comparable period from the previous financial year. The significant movements within core Crown functional expenses were as follows:

Functional expense	Movement from Previous year	Main drivers of the change
Social security and welfare	+ \$0.3 billion	<ul style="list-style-type: none"> • Indexation of welfare benefits
Health	+ \$0.2 billion	<ul style="list-style-type: none"> • Funding provided in the 2008 Budget to maintain and improve existing service levels
Education	+ \$0.2 billion	<ul style="list-style-type: none"> • Higher demand-driven expenses from roll growth • Funding provided in the 2008 Budget
Transport and communications	+ \$0.2 billion	<ul style="list-style-type: none"> • Impairment of the investment in KiwiRail Holdings Limited
Economic and industrial services	+ \$0.2 billion	<ul style="list-style-type: none"> • Primarily due to the introduction of the KiwiSaver initiative
Other	+ \$0.2 billion	<ul style="list-style-type: none"> • Mainly due to policy initiatives from the 2008 Budget
Total	+ \$1.3 billion	

Total Gains and losses were in a net loss position of \$1.7 billion for the period ended 30 September 2008, compared to a net gain position of \$0.6 billion for the same period the previous year. The \$2.3 billion difference is due to:

- lower than expected investment returns experienced in the 2008/09 financial year primarily resulting from the current downturn in financial markets; and
- an increase in the ACC unfunded liability since September 2007 due to increases in expected claim costs driven by economic assumptions (e.g. discount and inflation rates).

The **Core Crown residual cash** deficit increased by \$2.9 billion compared to the same period last year. This is primarily due to:

- the purchase of KiwiRail Holdings Limited
- the increase in core Crown expenses (as noted above); and
- a decrease in tax receipts

Net Core Crown debt has reduced by \$1.6 billion as a result of an increase in financial assets, primarily due to the strong outturn reported as at 30 June 2008.

FINANCIAL STATEMENTS

STATEMENT OF ACCOUNTING POLICIES

1 Reporting Entity

These financial statements are the consolidated financial statements for the Government reporting entity as specified in Part III of the Public Finance Act 1989. This comprises:

- Ministers of the Crown
- Reserve Bank of New Zealand
- Government Superannuation Fund
- Crown entities
- Departments
- State Owned Enterprises (SOEs)
- Air New Zealand Limited
- New Zealand Superannuation Fund

A schedule of the entities that are included in the Government reporting entity was set out on pages 85 and 86 of the *Pre-election Economic and Fiscal Update 2008* released on 6 October 2008.

All actual, forecast and comparative figures presented in these financial statements are unaudited.

2 General Accounting Policies

These financial statements comply with generally accepted accounting practice and with New Zealand equivalents to International Financial Reporting Standards (NZ IFRS) as applicable for public benefit entities. The measurement base applied is historical cost adjusted for revaluations of property, plant and equipment (where appropriate), commercial forests; and marketable securities, deposits and equity investments held for trading purposes. The accrual basis of accounting has been used unless otherwise stated.

These financial statements have been prepared on a going concern basis. All other policies have been applied consistently throughout the period.

3 Specific Accounting Policies

The specific accounting policies of the Crown are detailed on the Treasury's internet site:

<http://www.treasury.govt.nz/publications/guidance/finmgmt-reporting/nzifrs/policies-guidance>

4 Forecast Results and Assumptions

The forecast results in these financial statements have been derived from the forecasts released in the *Pre-election Economic and Fiscal Update* (PREFU), on 6 October 2008.

The assumptions underlying the preparation of forecasts are set out in the Statement of Accounting Policies and Forecast Assumptions reproduced in full on the Treasury's internet site:

<http://www.treasury.govt.nz/budget/forecasts/prefu2008>

STATEMENT OF ACCOUNTING POLICIES (*CONTINUED*)

5 Comparative Figures

When presentation or classification of items in the financial statements is amended or accounting policies are changed voluntarily, comparative figures have been restated to ensure consistency with the current period unless it is impracticable to do so.

Percentage variances between the actual and prior year balances exceeding 500% are not shown where the dollar variance is immaterial.

STATEMENT OF FINANCIAL PERFORMANCE

for the three months ended 30 September 2008

Prior Year to 30 June 2008	3 Months to 30 Sep 2007		Note	Current Year Actual vs Forecast				Annual Forecast

Notes on Borrowings

- Government stock includes \$395 million of infrastructure bonds.
- Derivatives are included in either borrowings or marketable securities, deposits and equity investments depending on their balance date value. This treatment leads to fluctuations in individual items within the Statement of Borrowings, primarily due to exchange rate movements.
- Total Borrowings (Gross Debt) is the total borrowings (both sovereign-guaranteed and non sovereign-guaranteed) of the total Crown. This equates to the amount in the total Crown balance sheet and represents the complete picture of whole-of-Crown debt obligations to external parties.
- Total Borrowings (Gross Debt) can be split into sovereign-guaranteed and non sovereign-guaranteed debt. This split reflects the fact that borrowings by SOEs and Crown entities is not explicitly guaranteed by the Crown. No debt of SOEs and Crown entities is currently guaranteed by the Crown.
- Gross sovereign-issued debt is debt issued by the sovereign (i.e. core Crown) and includes Government stock held by the NZS Fund, ACC or EQC for example. In other words, the total sovereign-issued debt does not eliminate any internal cross-holdings held by these entities. The Government's debt objective uses this measure of debt.
- Core Crown financial assets exclude receivables.
- Net core Crown debt is the Government sovereign-issued debt less financial assets. This can provide information about the sustainability of the Government's accounts, and is used by some international agencies when determining the creditworthiness of a country. However, as some financial assets are not easily converted into cash, and some are restricted, it is important to view net debt alongside gross sovereign-issued debt.
- Adding back the NZ Superannuation Fund Assets provides the financial liabilities less financial assets of the Core Crown, excluding those assets set aside to meet part of the future cost of New Zealand superannuation.
- The Reserve Bank has used \$1.6 billion of settlement cash to purchase reserves that were to have been funded by DMO borrowing. Therefore the impact of settlement cash on GSID is adjusted by this amount.

NOTES TO THE FINANCIAL STATEMENTS

Note 19: Acquisition of Toll (NZ) Limited

On 1 July 2008, negotiations were completed and an agreement was signed for the purchase of 100% of the shares in Toll (New Zealand) Limited. Prior to the acquisition, assets and operations not integral to the rail operation were separated out of Toll (New Zealand) Limited. On acquisition by the Government, the company was renamed KiwiRail Holdings Limited.

Ownership of the rail business is intended to place the Government in a better position to integrate rail planning and funding with its wider transport policy, and to ensure capital investment for improving the rolling stock.

The cost of acquisition of the company was \$690 million, settled in cash on 1 July. A provisional assessment as at 30 September 2008 of the fair value of the assets acquired and liabilities assumed through this purchase was \$448 million. No goodwill has been recognised and the difference between the provisional assessment of the fair value of the assets acquired and liabilities assumed and the cost of acquisition has been charged to the statement of financial performance.

The fair value of the assets acquired and liabilities assumed may be adjusted in future reporting periods to reflect final valuations. Final valuations must be completed within one year of the purchase date.

In the three month period to 30 September 2008, revenue earned by KiwiRail Holdings Limited of \$158 million and an operating deficit of \$4 million has been included in the financial statements of the Government.

Note 20: Subsequent Events

Deposit Guarantee Scheme

On 12 October 2008 the Minister of Finance announced an opt-in retail deposit guarantee scheme. The objective of the two year opt-in scheme is to ensure ongoing retail depositor confidence in New Zealand's financial system given the international financial market turbulence. Current retail deposits over which the scheme could provide coverage amount to approximately \$166 billion. Processing of applications from deposit takers has begun and approved deposit takers to date are listed on the Treasury web-site.

The Government is managing its exposure to this risk both through the prudential regulation processes for registered banks, and by requiring other deposit takers who sign the guarantee to agree to certain controls on their business including:

- Some restrictions on distributions to shareholders
- Some assurance that the business dealings of the deposit taker are on arms-length terms
- The ability for the Crown to appoint an inspector
- The ability for the Crown to withdraw the guarantee if the business is being deliberately operated in a way to undermine the intention of the guarantee; and
- Personal undertakings from directors to ensure the non-bank deposit takers comply with the guarantee.
