

Building affordable, quality starter homes for first home buyers

With a focus on areas with high-growth and affordability pressures across New Zealand

First home buyers are struggling to get on the property ladder

Home ownership rates are dropping

Now at the lowest level in over 60 years

- ✗ Not enough homes being built
- ✗ Not enough starter homes

KiwiBuild will help address these issues and restore the Kiwi dream of home ownership

How we'll get there

1

Free up more land

Land for housing: Using underused Crown land or private land for housing

2

Partner with private developers

Buying off the plans: Developments that would otherwise be delayed or not built at all, built under KiwiBuild

3

Leverage existing government developments

Building KiwiBuild homes as part of Government-led housing initiatives

4

Large scale projects

Major urban redevelopment projects that integrate housing, public transport, health, education

Supported by

Innovation – off-site manufacturing solutions

Streamline planning and consenting processes

Build capability and capacity of construction sector

Backed by \$2 billion investment by the Government

Ramping up
